DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 1-4, 6-9 and 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 4,828,261 (Kleylein)) in view of French Patent Number 2,666,994 (Muraille).

Regarding claims 1-3, 6-8, 11 and 12, Figures 1 and 3 of Kleylein show a racquet having an exchangeable grip portion 3 with three bulgings and two depressions. See also column 4, lines 18-30. Although Kleylein does not show a threaded knob at the end of the racquet shaft, it would have been obvious to one of ordinary skill in the art to do so in view of Muraille in order to allow a player to have increased power in certain shots. See Figures 1-2 of Muraille. To select features from

the prior art to effect results expected from these features is within the purview of 35 USC 103.

Regarding claims 4, 9, 13 and 14, Figure 9 of Kleylein shows that the grips can be used with non-circular cores as well.

3. Claims 5 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kleylein and Muraille as applied above in view of U.S. Patent Number 4,696,842 (Doubt).

Regarding claims 5 and 10, although Figures 1 and 3 of Kleylein show a circular core, Figure 9 shows that the grips can be used with non-circular cores as well. As such, it would have been within the level of ordinary skill to extend this teaching to other well-known tennis core cross-sectional shapes such as octagons. See Figures 1-4 of Doubt which show that tennis racquet handle cores having octagonal cross-sections are old and well-known in the art.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
